SELF

SPACE
ESTIMATOR

GET THE MOST IN YOUR STORAGE SPACE

Most self storage facilities offer a variety of unit sizes. The Self Storage Space Estimator is used to help select the right size for you.

The term Cube used in the Self Storage Space Estimator is the cubic feet that an article will normally occupy.

In an effort to help you determine what space size you need, inventory your goods using the space calculator and simply follow the steps below.

- Fill in the number of each article stored.
- Multiply the number of each article by the cube number.
- Put the answer in the Total Cube Column.
- Add the total number of cubic feet for all columns.
- Refer to the chart below and pick the right space size for you!

This calculation assumes your articles are fully stackable. Somewhat more space may be required for aisles to permit access to all items.
